Sapphire Discovery 67

diYachting
Yacht Management & Charter

New to charter in 2018, Sapphire is elegant and beautifully crafted by Discovery Yachts. In 2018 she is heading to the Mediterranean and will be available in the South of France, Corsica and Sardinia.

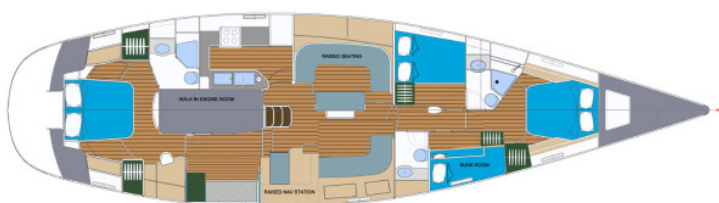

Layout

In the cockpit there is a spacious outdoor eating area and a BBQ, perfect to create that holiday feeling. She has a spray hood, bimini, cockpit cushions and sunbathing mats. Below decks the aft master cabin is very spacious and includes a king size bed with a large ensuite, dresser and 32" TV. Forward of the saloon is a bunk cabin and a double cabin with shared heads and forward of them is a VIP double cabin with en-suite. Depending on your needs the crew will use either the double or bunk cabin.

Equipped with generator, water-maker, air-conditioning and heating throughout all cabins, she is perfect for exploring these northern destinations. There is a comprehensive media system with dvd kaleidoscope system (100's of movies and music albums). Also fitted with an ice-maker, washer dryer, flat screen TVs in the saloon and master cabin, a dedicated 'beer only' fridge, she's ready for anything.

Performance

A large amount of marine technology and research was implemented into the design of the Discovery 67. This includes composite hull materials such as Vinylester and Kevlar, specially designed coatings to prevent osmosis, and some very lightweight foam core acoustic and thermal insulation. These lightweight materials not only provide a very strong basis to the vessel, with increased impact resistance, but also allow for much better performance at sea.
